## **LOCALLY ADJUSTABLE CDL RATING BANDS**

### **PROPOSAL**

Request the OCEC committee to ease up on the championship rating bands in regions where the local fleet does not match with the current CDL boundaries. Multiple choices exist to achieve this, one being to allow the Green Book to add a sentence that allows a better CDL fit from fleet to fleet. This should be done in agreement with organizers and ORC.

### **RATIONALE**

The European and World Championships held in Northern Europe in recent times have had very different participation numbers in the different classes due to the existing fleets not being equal to international racing fleets. Thus the competition has been very different for the different fleets and even the popular Worlds in 2021 being close to not having a valid Championship for Class A whilst Class C had to be divided into sub-fleets.
