MAST JACK PUMP

PROPOSAL

Remove the rule ORC 205.2 or add a penalty, like the one in place for forestay adjustment, to certificates for boats with the mast jack carried onboard.

RATIONALE

The mast jack is installed in most of the boats that are racing under ORC and it is becoming increasingly more difficult to check if this is in use while racing or not since in some boat types the jack is built into the mast and cannot be removed and stored.
