RATING OFFICERS COMMITTEE

ADJUSTABLE MAST FOOT

PROPOSAL

If there is a mast pump on board while racing then the Adjustable Mast Foot switch should be “on” for Adjustable Mast Foot.

RATIONALE

There are many boats measured with a mast pump on board in measurement trim and recorded under “Measurement inventory” but on the certificate “Adjustable Mast Foot” is recorded as “No”.

Therefore the 2023 ESP 2 submission rationale is still valid and the problem has not been corrected. The current practice is not according to the 2023 ITC Minutes if the Adjustable Forestay is in use while racing and not declared by the owner. If registered during measurement then the mast pump should also be treated accordingly.
