## **HEADSAIL FURLER**

### **PROPOSAL**

To delete in IMS rule F9.8 the sentence ..." which has HLP greater than 110% of J."

### **RATIONALE**

IMS rule F9.8 already limits the credit for the headsail furler to one headsail only. More and more boats have headsail furler with jibs smaller than 110% of LPG and some of them have only self-tacking jibs. The rating credit for having a headsail furler should be the same for all sizes of furling headsails (from small self-tacking jibs to large 130 or 150% genoas).
