TACKING POINT OF SPINNAKER

PROPOSAL

Delete ORC Rating Rule 108.8.

RATIONALE

Currently ORC Rating Rule 108.8 states Rated TPS shall not be taken less than $J + SFJ$, yet there are some classes of boats that tack their HSF's and Spinnakers in this space between the headstay and the bow.

Varied positions for TPS forward of the bow are already recognized by IMS, so why not aft of the bow as well.
