IN HOUSE CERTIFICATION

PROPOSAL

Clarify the rules about the In-House Certification (IHC).

RATIONALE

Often, we encounter sails that are measured by a sail loft and is not clear if they are IHC-compliant or not. For example, on all sails measure in Italy by a sail loft that are certified IHC, there is affixed a World Sailing sticker. However, many sails measured in a North Sails loft are without that sticker so it is not clear if that sail may have been officially measured or not.
