OFFSHORE SCORING SINGLE NUMBERS

PROPOSAL

To add to ORC International certificates the following scoring options to the existing APH:

- PREDOMINANT UPWIND (Offshore predominant upwind race)
- PREDOMINANT DOWNWIND (Offshore predominant downwind race)
- PREDOMINANT REACHING (Offshore predominant reaching race)

RATIONALE

Weather Routing Scoring (WRS) shall remain as the preferred scoring method for offshore races where it may be expected that boats will sail in different wind conditions.

However, use of WRS may have some limitations for which a backup solution should be provided through a selection of Single Number Offshore Scoring options as described above in addition to APH.
