ORC STANDARD PENALTIES

PROPOSAL

To review penalties for infringements of the ORC Rules and make it easier to understand and apply. ORC Rating systems shall define standard penalties for different ORC Rules infringements and these penalties shall not be changed by the SI or NOR in accordance with RRS 87.

RATIONALE

While ORC Rule 305.2 clearly defines penalties for certificate non-compliance there are other rules for which appropriate penalty should be defined and clarified.

The rule may be clarified to clearly define that penalty for infringement of any rule based on an owner's declaration, such as the declared crew weight or use of an asymmetric spinnaker tacked on the centerline, and this penalty shall only be disqualification.

There are also other rules of part 3 that may require different penalties. This submission is asking for a complete review and proposal for new standard penalty definitions.
